

Cami-Rolls' New Double Layered Camisoles for muffin top control!

By Beauty Snob Tina on August 14, 2009 6:00 AM | [Leave a Comment](#)

Cami-Rolls' brand new double-layered camisoles designed to offer women maximum tummy-taming coverage. The hidden inner layer, made of stretchy spandex material, tucks into bottoms slimming and smoothing the spare tire while the outer layer camouflages any unsightly rolls, without the risk of riding up. Cami-Rolls are unique because they don't look like typical shapewear: they look like an ordinary camisole. I just got a white one and have been wearing it with my hip hugging jeans, even if you're thin the low riders always squeeze up a muffin top but with these camisoles, everything is nice and flat :) I'm waiting for the black tops to arrive. Such a great basic to have in the closet! \$36 size XS-L [Get the Cami-Roll here!](#)
